

ERMES
HIGH HEADBOARD
design Rodolfo Dordoni
2012

With its stylish presence, Ermes epitomizes the skills of the Master craftsmen of the industrious Brianza district, north of Milan. These experts are famous for their ability to process wood and create furniture.

The elegance of this piece is exalted by the wide edge in Canaletto walnut heart wood, polished with a traditional or natural finish. It surrounds the headboard and the upholstered base with removable covers in fabric, leather or Ecopelle, decorated with top stitching. The bed is available as a double-size bed, and with two different types of headboard: the first is tall and as wide as the bed base: the second is shorter and extends beyond the sides of the bed. Available with box -spring base Comfort, with slatted mattress support with rigidity adjustment, with electric movements and electric/manual combined or with storage base.
