FLORA

ARMCHAIR
design Ilenia Viscardi
2021

Flora is a system of single or double seating units that can be combined to produce free, unconventional and endless arrangements that can be used indoors and in sheltered outdoor spaces.
The structure is padded and the fabric or leather cover can be easily removed thanks to black zips that run along the edges of the seat and the backrest; a deliberately strong graphic sign that highlights the curvature.
Optional removable 'cloak', in the same fabric or leather cover or in a contrasting colour. It is fixed with Velcro in the central and lower parts of the seat and with a counterweight in the rear of the backrest.
