design Pinuccio Borgonovo

2021

A modular system of furniture that, thanks to its design simplicity with clean lines, allows the creation of solutions that can be included in every room of the house: from living to dining rooms, from bedrooms to hallways or even in home offices.

The structure is a sheet of metal that has been curved harmoniously to produce sideboards in a range of dimensions, horizontal or vertical open storage units or with doors, shelves.

The visual lightness of the edges is balanced by the solidity of the materials; the simple shapes by the variety of the finishes (matt burnished, anodic bronze, oxide, silver oxide, desert rock, black, greige and white). The doors and the back panels are available in the same finishes or with a smoked or bronzed mirror finish.
