

PIERRE

ARMCHAIR SHELL
design Studio Contromano
2021

Armchairs with a soft, irregular shape and a padded seat with a completely removable leather or fabric cover, they are available in three dimensions and with a backrest in two versions: in the "shell" version the backrest is a curved metal shell that gives it a strong aesthetic sign, in the other the metal backrest is minimal and transversal, making the fabrics the real protagonists of this piece of furniture.

The option of freely combining the seat cover, the backrest cover and the metal finish (anodic bronze, white, matt burnished, black, greige, oxide, silver oxide and desert rock) makes the Pierre armchairs lively, young, capable of giving any environment a touch of personal originality.
